

About Karijini

Formerly known as Hamersley National Park, Karijini is centred in the Hamersley ranges in northwestern Australia. It is 100% owned by the Gumala Aboriginal Corporation representing the collective interest of the Traditional Owners – The Niapiali, Bunjima and Innawonga Peoples of the Pilbara region. The Eco Company brand is owned by Hospitality Inns – one of Australia's largest and most experienced hospitality and accommodation companies who have been operating motels since 1961.

The shared tents are semi-permanent structures that incorporate ecologically sustainable principles and can easily be erected and dismantled in remote areas with little impact to the natural environment using recycled materials wherever possible. Accommodation is rustic but clean and comfortable. May is a dry month with temperatures between 20-30 degrees.

The Eco tents are 3 way share:

Front and rear deck

Recycled timber flooring

Spacious interior containing set of bunk beds and one other bed (3 share)

This is the only configuration available to us unless you opt

for single upgrade \$245 extra per night or twin \$125 per person per night.

Quality bedding and linen is provided

Guests make up own beds

Please also note that Eco-friendly means -

Grey water treatment

Natural ventilation

No air-conditioning to Eco tents

Flow showerheads & spring loaded taps in shared ablutions

Solar power to ablutions

No mobile/internet reception

Eco-friendly is great fun once you get the hang of it. Our tents have views of the Hamersley Range and Karijini boasts some of the most rugged landscape, stunning gorges, breathtaking waterfalls and sparkling rockpools in all of Australia. We will be in the hands of an expert guide who will assist with our gear when descending into the painting areas.

*Please note that all participants will be required to sign a waiver of indemnity in the event of an unforeseen accident or insufficient level of fitness for managing the stairs or walking when required. Walks are graded and this should be taken into account according to your level of fitness prior to embarking on a walk.
